External Dust Collector - Esterno Estuboorgelüer
Filtre depositoare externe - Filtre depositoare externe

Options
 External dust collector with:
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel

Working Principle
 The dust is drawn into the dust collector by means of a centrifugal fan and is separated from the air stream in a cyclone. The dust is collected in a hopper at the bottom of the dust collector.

Advantages
 The dust collector is made of stainless steel and is therefore hygienic and easy to clean. It is also very durable and has a long service life.

Applications
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel

Materials
 • 304 or 316 stainless steel

Accessories
 External dust collector with:
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel
 • 100% stainless steel

 Capă de protecție (accessorie)

Vibrating Screen - Vibrator
Oră vibrante - Zăvoacă vibrante

Self-Cleaning System - Sistemă de curățare automată
Sistemă auto-curățantă - Sistemă auto-curățantă

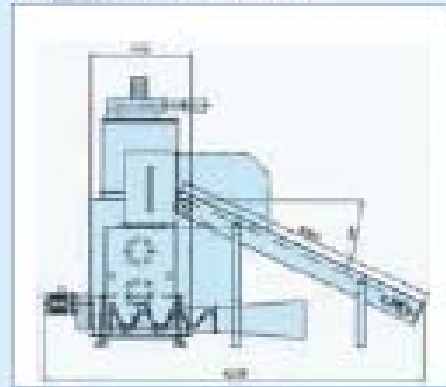

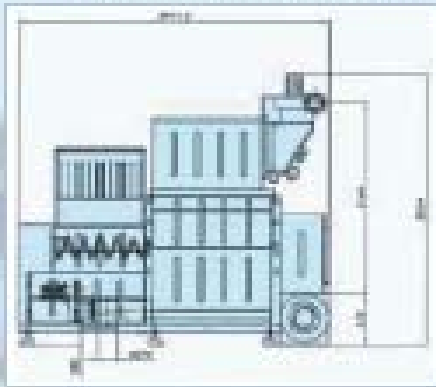

Ball Conveyor - Sistemă de transport
Transportor à bilă - Transportor à bilă

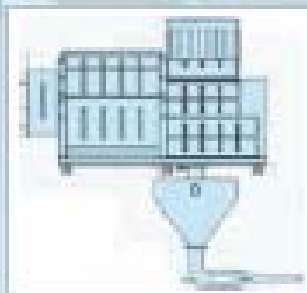

Collecting Screw Conveyor - Sistemă de recoltare
Via extractivă - Colectiv de recoltă

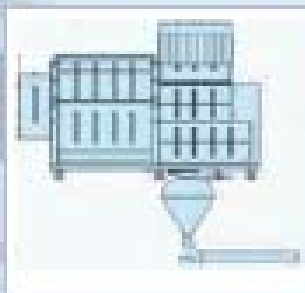

Overall dimensions - Einbaumaße - Encombrement - Ingombro

**Examples of Application - Einbaubeispiele
Exemples d'application - Esempi di applicazione**

Pneumatic Conveying with Vertical Blower
Pneumatisches Fördersystem mit Vertikal-Blower
Transport pneumatique avec souffleur vertical
Trasporto pneumatico con soffiatore verticale

Pneumatic Conveying with propeller
Pneumatisches Drückförderer mit Propeller
Transport pneumatique avec propulseur
Trasporto pneumatico con propulsore

Pneumatic Conveying with Flow-Through-Valves
Pneumatisches Druckförderer mit Durchlassventilen
Transport pneumatique avec vannes à obturation
Trasporto pneumatico con valvole
